The Wowza GoCoder™ SDK is freely available software that lets you build live streaming mobile apps for iOS and Android that:

- Capture and encode audio and video streams (including 4K) using built-in libraries
- Broadcast streams through Wowza Streaming Cloud™ or Wowza Streaming Engine™ for delivery at scale to any device or destination globally
- Play streams from the Wowza Streaming Cloud with Ultra Low Latency service

For more information, see the Wowza GoCoder SDK FAQ.
