Learn about the Java SDK for the Wowza Streaming Cloud™ service.

About the SDK

The Wowza Streaming Cloud Java SDK is a client library for the Wowza Streaming Cloud REST API. If you're building a Java application that leverages the Wowza Streaming Cloud service, the SDK can ease your getting started experience and accelerate your development process. The Java SDK is a work in progress, and we encourage you to provide feedback on how it can best evolve to meet your needs.

Accessing the SDK

The SDK and its documentation is hosted in GitHub.
