

WOWZA CLEARCASTER

The purpose-built appliance providing the best broadcast-quality and highest reliability to Facebook Live.

The Wowza™ ClearCaster™ appliance is a Facebook Live solution purpose-built to deliver the best picture quality on Facebook Live. Deeply integrated with the Facebook Live application, the ClearCaster automatically sets the best encoder settings and dynamically adjusts them throughout the broadcast to deliver 1080p resolution to any page and the most reliable broadcasts for your followers.

Highest Quality

The only way to broadcast crystal-clear 1080p to any page on Facebook Live.

Built for Professional Productions

Rack-mountable, 12G SDI input, remote manager and frame-accurate starts for a professional production.

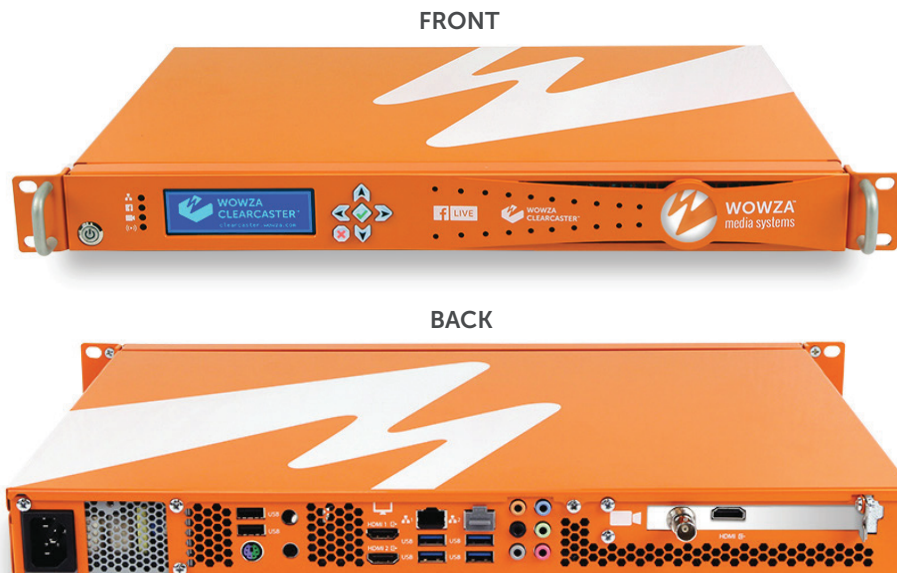

Bulletproof Reliability & Redundancy

End-to-end redundancy and real-time stream monitoring with auto-adjustment ensures the most reliable broadcasts.
